

- Victron Energy IBC Automotive Training

# Training topics

Victron Energy Automotive Products:

Phoenix Inverters

IP65 & IP67 Chargers

Small MPPT Chargers

Orion TR Smart & Cyrix Battery Combiners

BMV & Smart Shunt & Battery Balancers

Cerbo GX & Ekrano GX

# Automotive Products

# Phoenix Inverters

- Battery Inverter for Automotive
- 250 - 1200VA
- Fully Configurable
- VE.Direct communication port
- IP21 protection

# VE.Direct to Bluetooth Smart dongle

- Bluetooth Connectivity for non-smart products  
BlueSolar MPPTs & Phoenix Inverter  
VE.Direct & BMV
- VE.Smart Networking
- Instant Readout

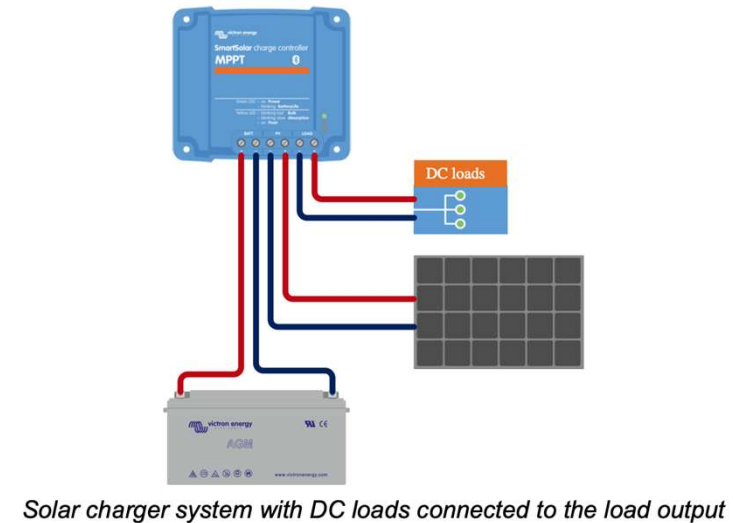

# IP65 & IP67 Smart Chargers

- 6V & 12V 1,1A (Automotive IP65) 12V, 4A - 25A
- 24V, 5A, 8A, 12A & 13A
- Bluetooth built in (except Automotive IP65)
- Can be used as Power Supply (except Automotive IP65)
- Quick Battery Connectors & Accessories – For IP65 models

# SmartSolar Charge Controllers

- MPPT 75/10, 75/15, 100/15, 100/20-48V
- Load Output
- Outstanding MPPT Algorithm
  - Ultra fast MPP tracking
  - Optimal Solar Yield

Solar charger model	Maximum PV voltage	Maximum battery charge current	Suitable battery voltages
MPPT 75/10	75V	10A	12 and 24V
MPPT 75/15	75V	15A	12 and 24V
MPPT 100/15	100V	15A	12 and 24V
MPPT 100/20	100V	20A	12, 24, 36 and 48V

# MPPT Solar Charger range

## BlueSolar

75 V	10	15									
100 V		15	20	30			50				
150 V					35	45		60	70		100 VE.Can

## SmartSolar

75 V	10	15									
100 V			20	30			50				
150 V					35	45		60	70	85	100

## SmartSolar VE.Can

150 V									70	85	100
250V									70	85	100

## SmartSolar RS

450 V											100A	200A
-------	--	--	--	--	--	--	--	--	--	--	------	------

Q4 2021

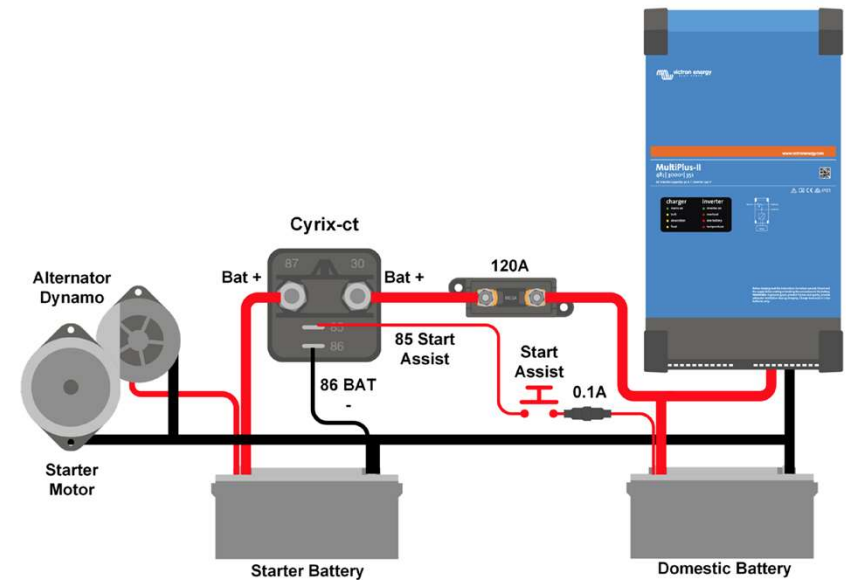

# Orion TR Smart Non-Isolated & Isolated

- Bluetooth Smart Enabled
- Suitable for use in vehicles with a smart alternator
- Adaptive 3-stage charge algorithm: bulk – absorption – float
  - 220-400W – Isolated range
  - 360-400W – Non-Isolated range
  - Can be paralleled
  - IP43 protection

# Cyrix-ct 12/24V 120A & 230A

- Intelligent battery monitoring to prevent unwanted switching
- 12/24V auto ranging
- Prioritising the starter battery
- Protection against overheating
- No voltage loss
- IP 54 protection

# BMV 700 series - Battery Monitors

- Battery 'fuel gauge', time-to-go indicator, and much more
- 500A Shunt included – 1000A, 2000A & 6000A Shunt optionally available
- Midpoint voltage or temperature monitoring (702 & 712 series only)
- Bluetooth built in on BMV 712
- Flush Mount Display
- VE.Direct Communication

BMV-702 Black

# SmartShunt & SmartShunt IP65

- 500A, 1000A & 2000A
- Measures voltage of second battery, temperature, or midpoint voltage of battery bank
- 6.5 – 70VDC operating voltage
- IP21 & IP65 protected
- VE.Direct communication

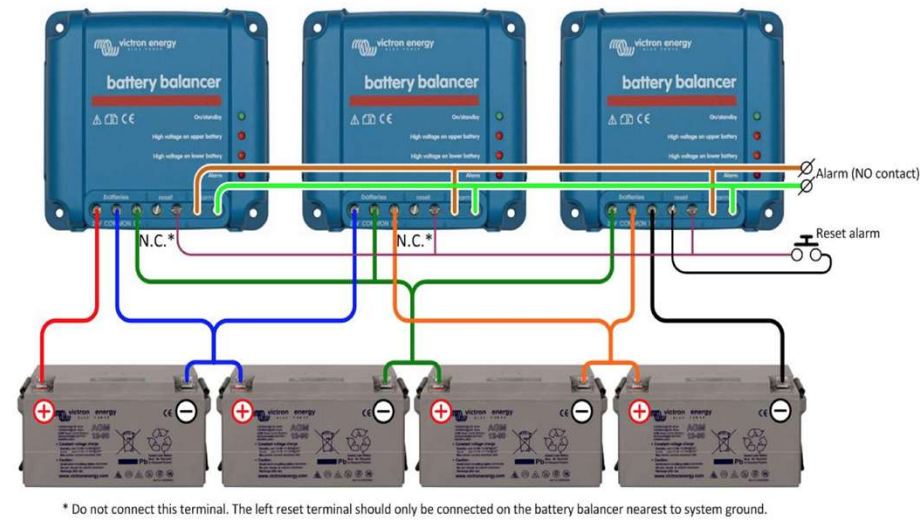

# Battery Balancer

- Lead-acid Intelligent battery balancer
- For 24V Systems
- Prolongs Battery Life
- 3 units can be used for 48V Systems
- Alarm Relay
- IP22 protection

# Battery Balancer

- The problem:
  - unbalanced batteries connected in series
- The Solution:
  - battery balancing
- Turn on Level:
  - 27.3V / 54.6V
- Mid Point Deviation to turn on:
  - 50mV

Three Battery Balancers connected to four series connected 12V batteries (48V system)

# Cerbo GX & GX Touch 50/70

- Wifi and Bluetooth access via VictronConnect app
- DIN rail mountable via optional accessory
- Powerful Dual CPU that enables more connectivity
- With or Without Display
- GX Touch 50 and 70 is a waterproof, touch screen
- Also polaroid lens visible

# Cerbo GX

# Features

- System display
- Internet connectivity and monitoring via LAN or WiFi
- Data logging via SD card or USB stick
- Remote console
- GPS positioning with USB GPS dongle
- Remote VEConfigure
- Remote firmware updates (not VE.Bus)
- System battery state of charge, max charge current and voltage sense
- And much, much more.....

# GX Accessories

Mounting enclosures For CCGX

Wi-Fi dongles Short and long range

VE.Can tank sender  
VE.Can power cable

GSM/GPS module 3G

CanVu extender kit (Essential)

GX touch 50 (for Cerbo)

Cerbo Din rail mounting kit

Temperature sensor

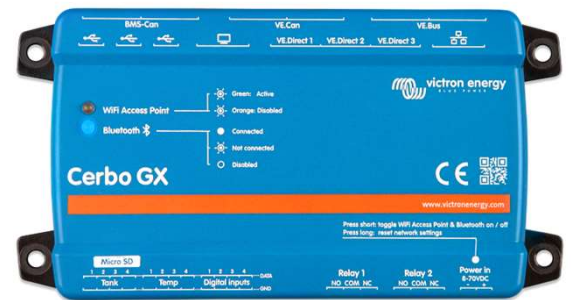

# VE.Direct connections

- VE direct is a point to point protocol, maximum distance is 10 meters
- Use a VE.Direct-USB interface if more VE.Direct connections are needed
- If more connections are needed use a powered USB (or use VE.Can MPPTs)
- Maximum VE.Direct devices: Cerbo = 3, CCGX = 5, Venus= 6, Octo= 10, Maxi=25

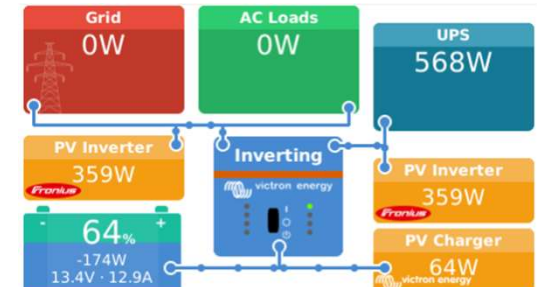

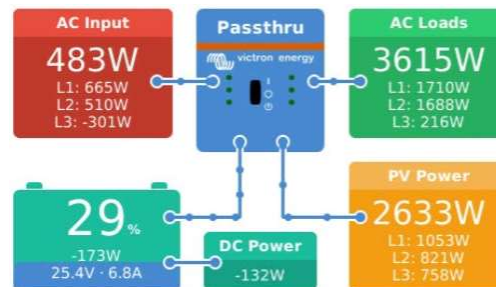

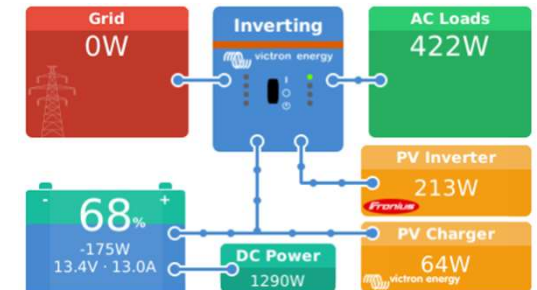

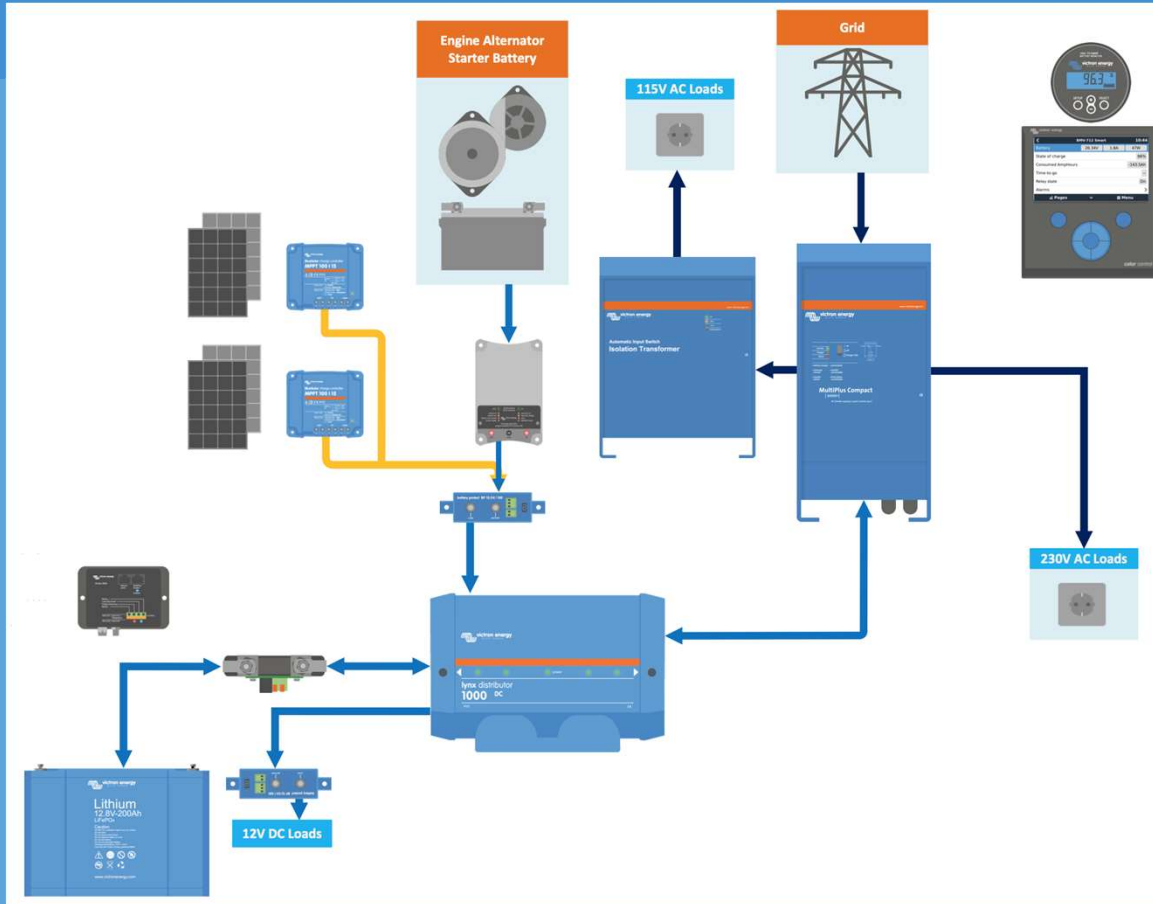

# VENUS OS

# System displays

- Inverter/charger
- AC in loads
- AC out loads
- PV on AC Out
- PV on AC In
- UPS loads
- Battery parameters
- DC solar charger PV
- DC loads
- Energy flow directions

# Communication Ports and protocols

Protocol	Product	Software		Monitor
VE.Bus 	Multi, Quattro, EasySolar, EasyPlus, large inverters, Phoenix charger*	VEConfigure		
VE.Direct 	MPPT, BMV, PowerPack, new small inverters, Phoenix charger IP43, Skylla IP43BluePower charger**	VictronConnect		
VE.Can 	CAN MPPT, Lynx, Skylla I, Skylla IP44, Skylla IP43, Tank sender	VE Power Setup		
BMS-Can (Type A or B Cable) 	A BMS-Can port is a port dedicated to be used for connecting managed batteries	Battery dependant		

Limited connectivity:

\* = only VEConfigure

\*\* only via Bluetooth

# How to connect GX device to the internet

## Via LAN

- Ethernet cable
- Wi-Fi - GX device might need a Wi-Fi dongle

## Via mobile phone network:

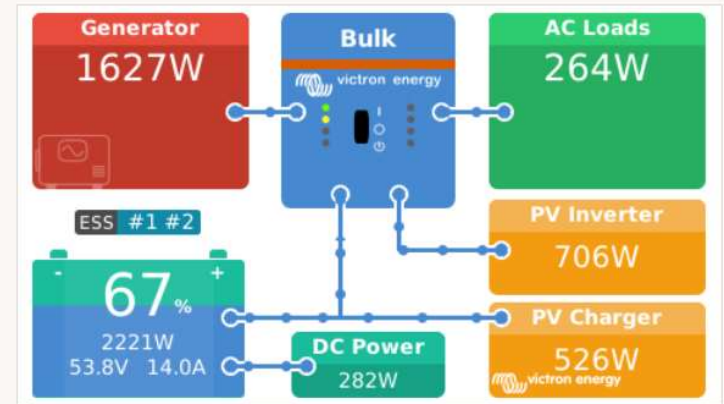

- 3G - use GX GSM
- Use a 3g or 4g router
- Use mobile phone hotspot

# System Setup

- Define system Name
- AC input 1 & 2 source (Quattro only for ac 2)
- Monitor for Grid failure, this feature when enabled send a email when triggered.
- Battery monitor selection
- Has DC system feature is enabled if a system has DC charging or discharging sources connected to the battery bank like an Alternator or DC generator.

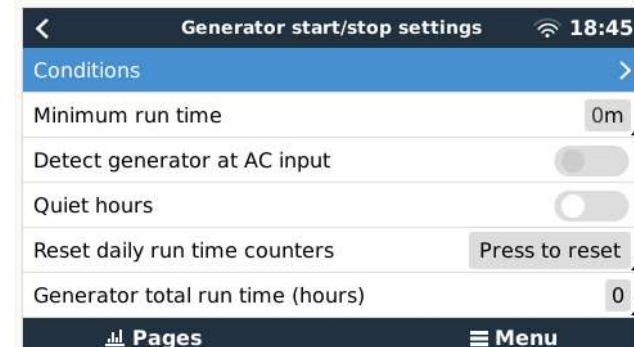

# Generator Start and Stop

You can setup start stop functionality for generators using the relay on the GX device (potential free contact)

Conditions such as SOC can be defined that suits the user

Fantastic features are minimum runtime and quiet hours

# Relay

Select the relay function the possible functions are

- Alarm relay
- Generator start/stop
- Tank pump

Energy. Anytime. Anywhere.
