Rensol Africa Farm Installation

A farm in the Western Cape has significantly enhanced its energy efficiency with a 62.1kWp solar system installed by Rensol Africa. This system, featuring 115 LONGi Solar 540W modules and an SMA International Core-1 grid-tied inverter, is designed to optimise energy use and reduce costs. This initiative highlights the farm's commitment to sustainable practices and energy independence, contributing to both environmental conservation and economic savings.
